## PROFILE

Passionate Computer Science student specializing in frontend development. Skilled in designing and building dynamic, responsive web applications using React.js, Next.js, Tailwind CSS, Laravel, and Bootstrap. Focused on creating visually compelling user interfaces and robust functionality while eager to expand expertise in delivering seamless and user-centric digital experiences.

## EDUCATION

Aug 2022 – Present

**UNIVERSITAS NEGERI MALANG**  
*Department of Electrical and Informatics Engineering*  
3.83 GPA (Current)

## EXPERIENCE

Aug 2024 – Present

**PASTIJADI DIGITAL SOLUTIONS** *Full-Stack Developer*

- Developed a feature-rich accounting application, handling tasks from database design to user interface functionality.
- Deployed the application and enabled email verification using cPanel to ensure accessibility and user engagement.
- Maintained effective communication with team members to meet project requirements and adhere to specifications.
- Collaborated using Git for version control and participated in weekly team meetings to track progress and align goals.

Jun 2024 – Nov 2024

**PUI-PT DLI (DISRUPTIVE LEARNING INNOVATION) UM** *Front-End Developer*

- Designed and implemented scalable, user-friendly front-end interfaces for educational web applications using Next.js, Tailwind, and Shadcn UI.
- Worked in a collaborative team environment, utilizing Git for version control and participating in regular weekly meetings.

Apr 2023 – Jan 2024

**UNIVERSITAS NEGERI MALANG** *Front-End Developer*

- Created and optimized scalable front-end interfaces for educational web applications with technologies such as Next.js, Tailwind, and Shadcn UI.
- Engaged with team members and lecturers to ensure the applications met detailed requirements and specifications.
- Contributed to collaborative development efforts using Git and maintained consistent communication through weekly meetings.

Feb 2022 – Jul 2022

**PT PROMEDIA CITRA INFORMATINDO** *Full-Stack Developer*

- Developed a dynamic school profile website, utilizing Laravel for backend development and Vue.js for the frontend.
- Implemented a secure multi-role authentication system for managing access levels across administrators, operators, and students.

Jan 2021 – May 2021

**KEMENTERIAN KOMUNIKASI DAN INFORMATIKA REPUBLIK INDONESIA** *Full-Stack Developer*

- Built a sub-district profile website using WordPress, enhancing the design and functionality of the existing sub-district websites.
- Improved user navigation and responsiveness by redesigning templates for better visual appeal and usability.

---

## PROJECTS

---

- **Parkirin ([URL](#))**  
*Tech Stack: Next.js, TypeScript, Tailwind, Shadcn/UI, Go, PostgreSQL*  
A web-based platform designed to connect parking attendants with partners offering job opportunities. The platform enables attendants to apply for jobs and allows partners to approve applications. I contributed to the frontend development by creating interactive user interfaces and implementing API integration for attendants. Additionally, I developed a multi-role authentication system to enhance platform functionality.
- **SINUMI - Aswaja Loyalty and Militancy Application ([URL](#))**  
*Tech Stack: Next.js, TypeScript, Tailwind, Shadcn/UI, Prisma ORM, MySQL*  
A web application developed for PUI-PT DLI at Universitas Negeri Malang in collaboration with Nahdlatul Ulama Organization. The platform supports Aswaja learning with features like module-based learning materials, real-time group discussions, real-time consultations with instructors, and premium membership access. My role involved implementing the frontend with an interactive and dynamic user interface to ensure a seamless user experience.
- **SINUPI - Interactive Aswaja Learning Application ([URL](#))**  
*Tech Stack: Next.js, TypeScript, Tailwind, Shadcn/UI, Prisma ORM, MySQL*  
Another web application developed for PUI-PT DLI at Universitas Negeri Malang in collaboration with Nahdlatul Ulama Organization. This platform offers features such as virtual classrooms, real-time discussions, interactive quizzes, educational games, and an achievement system. I contributed by implementing a user-friendly and visually dynamic frontend interface to enhance engagement and usability.
- **School Inventory**  
*Tech Stack: Next.js, TypeScript, Tailwind, Shadcn/UI, Prisma ORM, MySQL*  
A web application developed for lecturers at Universitas Negeri Malang to digitize school inventory and document management. It includes features such as item and document registration for each location, item transfer records, damage reporting, and movement history tracking. My role involved developing the frontend, ensuring an intuitive interface and efficient user workflows.
- **Accounting App ([URL](#))**  
*Tech Stack: Laravel, Bootstrap, MySQL*  
A web-based application developed for Pastijadi Digital Solution to manage financial records. The application includes features like income and expense tracking, analytics dashboards, master data management, and other financial operations. My contributions involved designing the backend functionality, database architecture, and several user interfaces to streamline financial management processes.
- **Pasar Digital Sambigede ([URL](#))**  
*Tech Stack: Laravel, Bootstrap, MySQL, Filament*  
A web-based platform developed for Desa Sambigede, Kecamatan Sumberpucung, Kabupaten Malang. This platform empowers local artisans and entrepreneurs by providing a digital marketplace to showcase and sell their products.
